Internet Options and Expectations

Westmead House can provide you with a reliable internet connection for your office. There are a number of packages available that can be suited to your usage requirements and budget.

ADSL Broadband ↓12-15Mbps ↑0.5-2.5 Mbps From £15

A basic broadband package designed for light to moderate users.

Sharedband ↓From 20Mbps - 50Mbps ↑From 2Mbps - 5Mbps From £60

A unique service for users with a higher speed demands, competitively priced. The service combines multiple ADSL connections, permitting users higher speeds to that of a single ADSL connection.

EFM Leased Line ↓↑ 5Mbps - 20Mbps From £180

Ethernet First Mile is a cost-effective method for businesses to benefit from a Leased Line, using copper rather than fibre optics. This service offers symmetric download and upload speeds and excellent SLAs.

Contention Ratios

Contention ratios establish how many businesses share a single broadband connection at your exchange.

Nomis Connections offer business broadband services with 10:1, 5:1, 2:1 and 1:1 contention.

These are drastically lower than household & cheap business contention rates that average between a 50:1 and 20:1 ratio.

Business Leased Lines (EFM/Fibre) offer an uncontended 1:1 service, guaranteeing that you don't share with anyone else.

Keeping your existing numbers? It's easy to take your existing fax and telephone numbers with you when you move into Westmead House - we have a number of ways of doing so, please speak to one of our specialists for details.

Dedicated VoIP Broadband From £45

Our Assured broadband package provides your business with a dedicated internet connection for VoIP calls, ensuring flawless quality for up to 20 VoIP calls at once.

Current Offers: Extend past our 12 month standard contract and receive one or both of the following:

- A free managed Cisco router & activation worth £300
- Free Cisco IP handsets for every user with our Horizon Hosted VoIP phone system service

Fibre Leased Line ↓↑ 10Mbps - 1Gbps From £420

The ultimate business internet connection: Your own dedicated Fibre pipe, giving symmetric speeds and scalability up to either 100Mbps or 1Gbps, down & up-load. You will benefit from unbeatable SLAs including 6 hour fix-time and proactive fault-monitoring.
